

GET THE UPDATED 2024-2025 COVID-19 VACCINE

CDC recommends everyone 6 months of age and older get the updated 2024–2025 COVID-19 vaccine. Three vaccines are available: Pfizer, Moderna, or Novavax (12 years of age and older) and they all protect against serious illness from COVID-19.

One vaccine is not recommended over another. You should get the vaccine that is available to you and is appropriate for your age. It is OK to get a different brand of vaccine from your previous doses.

AGES 6 MONTHS TO 4 YEARS	AGES 5 TO 11 YEARS	AGE 12 AND OLDER	AGE 12 AND OLDER
At least 1 dose of updated COVID-19 vaccine (may need multiple doses to be up to date)	 1 updated COVID-19 vaccine	UNVACCINATED 1 updated Pfizer or updated Moderna COVID-19 vaccine OR 2 doses of updated Novavax COVID-19 vaccine	VACCINATED 1 updated COVID-19 vaccine

The virus that causes COVID-19 is always changing, and protection from previous COVID-19 vaccines declines over time. Receiving an updated COVID-19 vaccine can restore protection and provide enhanced protection against the variants currently circulating.

People who are moderately or severely immunocompromised may get additional doses. Talk to your health care provider.

Talk to your health care provider if you have any questions about the updated 2024-2025 COVID-19 vaccine, or visit [About COVID-19 Vaccine \(www.health.mn.gov/diseases/coronavirus/vaccine/basics.html\)](https://www.health.mn.gov/diseases/coronavirus/vaccine/basics.html) or [CDC: Staying Up to Date with COVID-19 Vaccines \(www.cdc.gov/covid/vaccines/stay-up-to-date.html\)](https://www.cdc.gov/covid/vaccines/stay-up-to-date.html) for more information.
