FOOTNOTES

- 📍 Submission of clinical materials required. Submit isolates or, if an isolate is not available, submit material containing the infectious agent in the following order of preference: a patient specimen; nucleic acid; or other laboratory material. All medical laboratories that perform genetic sequencing for any diseases listed should submit sequence data upon request. More information is available at www.health.state.mn.us/diseasereport.
- 📍 Invasive disease only: isolated from a normally sterile site, e.g.: blood, CSF, joint fluid, etc.
- 📍 In the event of SARS or another severe respiratory outbreak, also report cases of health care workers hospitalized for pneumonia or acute respiratory distress syndrome.
- 📍 Also report a pregnancy in a person with Zika; or a person chronically infected with hepatitis B, HIV, or syphilis.
